NOTE

- 1. Each output can provide up to maximum load, but total load cannot exceed rated output power.
- 2. Line regulation is measured from low line to high line at rated load.
- 3. Load regulation is measured from 20% to 100% of rated load at 220VAC input.
- 4. Ripple & noise are measured at 20MHz of bandwidth by using a 20cm long 12" twisted pair-wire terminated with a 0.1uF & 47uF parallel capacitor.
- 5. Efficiency is measured at rated load and 220VAC input.
- 6. Hold-up time is measured at rated load and 220VAC input.
- 7. Output voltage monitor display models. no-load power consumption of 1.5W. and no Energy Conservation Power Erp Regulation.
- 8. Reign Power reserve the right to change specifications at any time without notice.
