How to read our product code: Example PM240 110/24

PM240 = Family code

110 = input voltage code 110

24 = Output voltage 24 V

FEATURES

Overvoltage protection OVP

The output voltage is limited to 15 % over nominal output voltage by an extra regulation circuit.

Extra output with series diode

Use the series diode output when the output is connected in parallel with other power supplies to achieve redundancy.

Over / Under voltage alarm

The built in relay changes to alarm state if the converter output voltage is not within 90 to 115 % of nominal output. The user can select NO or NC relay function. The relay rating is 30 V 0.5 A (d.c. or a.c.)

OPTIONAL FEATURES

Inrush current limit with NTC

Reduces the inrush current during start up. The input voltage range will be affected. Only available on 110 & 220 input code.

Conformally coating

For environment with high non condensing humidity max 98 % RH.

+70 °C operating temperature

Contact factory for derating as it depends on model. The alarm can not be used at +70 °C.

Mounting brackets L214-1

See figure 3.

19" Rack mounting set PL88-2

To mount two PM240 together to form a full 19" rack unit, see figure 2.

19" Rack mounting bracket PL88-3

To mount one PM240 to form a full 19" rack unit, see figure 2.

EN IEC 61000-4-5 level 4

External varistor + surge arrestor mounted from pole to ground. With this filter the input meets level 4 of EN IEC 61000-4-5 (+/-2 kV line to line, 4 kV line to ground)

DIN-rail clips

Clips to mount PM240 on a 35 mm DIN-rail. (Used with PL88-1 & L-214 see figure 3)

Train input

Input voltage range according to train standard EN 50155 and IEC 60571.
